

## SBP COMMITMENT

United Loggers OÜ undertakes to implement and comply with the requirements of the EUROPEAN PARLIAMENT AND OF THE COUNCIL (RED-III) and the Sustainable Biomass Program (SBP) applicable to biomass production.

United Loggers OÜ understands that mass balance principles are critical in meeting and verifying the sustainability requirements of biomass arising from the RED-III Directive. Therefore, the company has developed procedures to ensure the consistent implementation and performance of these principles.

These procedures include training for our employees, cooperation with suppliers and regular internal and external audits.

United Loggers OÜ aims to ensure that the biomass we produce meets the applicable requirements of the RED-III sustainability, SBP standards and local legislation, and that the relevant activities and processes are documented and auditable
